Enhanced Permabond Adhesives and Sealants Brochure

SOMERSET, NJ – Permabond Engineering Adhesives launched an enhanced version of their product brochure. This newest edition of the brochure contains new products and increased temperature limits for existing products. Easier to read charts and graphs of a vast array of data related to product selection and usage recommendations are included. Adhesion, strength, flexibility, thermal expansion, environmental and chemical compatibility, and many more topics are covered. The brochure provides guidance for industrial use of adhesives and sealants on metal, plastic, composite, and glass components.
